

Last night's homework pg 98

43

Dallas ~~s~~ $\bar{x} = 44.28$

~~S~~ = 4.04

NY $\bar{x} = 50.92$

S = 6.69

Coefficient of Variation = $\frac{S}{\bar{x}} \times 100$

Dallas 9.123%

NY 13.14%

What does this mean?

← The salaries in NY are more variable.
